

# KNOW MORE about sibling sleep and your baby

**The safest place for baby to sleep is in a cot in  
your room for at least the first 6 months**

**NEVER** let your children share beds with their baby brother  
or sister. Young children can easily roll on top of their baby  
brother or sister and suffocate them.

**Local babies have died this way.**

Keeping babies safer in the Black Country designed and developed  
by Dudley Council Public Health endorsed by Black Country CDOP
